

Choosing the right finish can make your floor SHINE.

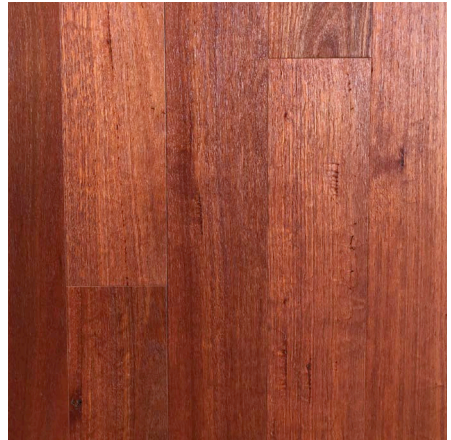

Choosing high quality solid hardwood flooring is an important step to having a beautiful floor installed in your home.

BUT, choosing what finish is applied on top of your floor can make all the difference to the look and feel.

Finish choices are developing at a rapid pace and products that give a more natural deep earthy tone are becoming popular.

Blue Gum with Water Based Finish

Blue Gum with Oil Based Finish

This example shows 2 panels of Sydney Blue Gum with alternate finishes applied.

A water based finish gives a lighter appearance, whereas an oil type finish brings out a deeper darker tone.

While these examples are only indicative, they do show the deep richness that can be achieved depending upon the finish that is applied.
