Shou Sugi Ban

REFINED ARCHITECTURAL CLADDING

烧杉板

Achieve great design without great effort by integrating our charred timber cladding into your next designs façade.

Why choose Shou Sugi Ban Refined Architectural Cladding?

Nationwide Timber researches and strives to only use the best suppliers that love and are experts in drying and manufacturing timber products along with heed for innovation in our industry subsequently fuels both us and our suppliers drive to produce quality timber products, and in this case, a quality timber system.

Shou Sugi Ban Refined Architectural Cladding is a complete solution for any wall, offering not just a precision milled piece of charred timber cladding but also the detailed trims to ensure a streamline finish and watertight result.

Profile Design Coulee

Collective features include:

- Relief grooves which are designed to take the stress out of the cladding, reducing the effect of warping and cupping.
- Screw location line indicates exactly where to fix the cladding board, allowing the next row to slide over the existing board and create a secret fix finish.
- Allowances have been made for expansion gaps, but must be implemented using a 6mm spacer to achieve a uniformed shadow line.

** View the installation guide for more details.*

Trim designs external corner, internal corner, end stop

Shou Sugi Ban trims provide a streamline finish and play an integral part in ensuring a water tight finish. All aluminium trims are factory fitted with waterproof gaskets* designed to decrease the on-site sealing process, and reduced the delivery of loose materials.

** 9mm x 1.6mm gaskets are factory fitted. Additional foam gaskets, to form second moisture barrier, are available in rolls for on-site installation, or alternative sealant method can be implemented.*
